Facility Availability

Effective September 8th, 2011

Normal working hours for the Materials Engineering Electron Microscopy facility are between 8:30AM and 4:30PM, Monday to Friday. The facility is closed for all statutory holidays as well as any day that the University of British Columbia is closed.

The Materials Engineering Electron Microscopy laboratory facilities are available to qualified members of the Materials Engineering department, unsupervised, outside of normal operational hours. Given the nature of the facility, the sensitivity of the equipment, and the myriad hazards posed to operators, there are several requirements that need to be met to gain access to the facility outside of normal working hours.

- Member of the Materials Engineering department
- Approval from your adviser (Graduate students only)
- Approval from your supervisor (Staff only)
- At least 100 hours logged on microscopes you intend to operate
- Full approval of the Electron Microscopy Technician

Those not meeting the above requirements will not be provided access to the Electron Microscopy laboratory outside of normal operational hours.
